

BOOMAROO 22'

BOON

BOOMAROO 22'

The Ideal Family Fun Cruiser . . . plus Trailerable rugged Racer . . . the new Boomaroo 22' gives you the best of BOTH! Her high performance hull and full masthead sail plan make the Boomaroo 22' a tough competitor. Deck and hull hand lay up reinforced fibreglass laminate with non-skid surfaces and colors permanently moulded in. The hull is designed for maximum safety and a beam of 2.3 metres plus a draught of 1.5 metres with board lowered give exceptional stability. The quality fibreglass construction and unique retractable keel make her an ideal trailer boat that lets you enjoy the fun, with greater economy and far less maintenance. The retractable keel has a locking device ensuring that the keel remains secured in any desired position. Below, the Boomaroo 22' is a masterpiece of functional planning that features a standard teak veneer dinette table that seats five, loads of storage space, and room for an optional,

enclosable marine head. The unique sliding galley with stove, draw, sink, 27 litre water tank, pump and ice box slides away under the rear cockpit seat so that five can sleep aboard in comfort without using confined quarter berth. Two forward bunks, settee bunk, and double dinette bunk. 75% of the cabin roof lifts as a pop top to give 1.7 metres of head room and the well-designed trailer with large rocking rollers allows easy launching without immersing the wheel bearings. Compare the Boomaroo 22' with any boat her size. . . feature for feature . . . dollar for dollar, she can't be beaten.

This yacht is made under licence from Catalina Yachts and is known in North America as the Catalina 22' where over 5,000 have been sold. It is also made under licence in the U.K. as the Alacrity 22' and in Europe as the Jaguar 22'.
