

From Hunter Marine Corporation

Introducing The All New

Hunter 25

The new Hunter 25 is an upgraded version of our highly successful Hunter 24. She is our largest trailerable model, and benefits from her fixed shoal keel design. With 35% of the displacement as keel ballast, the stability is excellent. This allows you to carry a generous sailplan for performance while having the confident feeling of a stable platform.

The large cockpit will accommodate your family and friends to enjoy the spirit of sailing in a comfortable way. Tiller steering is standard, plus we offer a wheel steering option; unusual in a trailerable design, however your family will appreciate the simplicity.

Inside, you'll find sleeping space for four adults, a private head design and functional galley with stove, sink and icebox. A great weekender design.

The New 25 is available for delivery from your nearest Hunter distributor. Visit www.huntermarine.com for further details and distributor locations.
