

# WINDWARD 7

An old favourite revived

By LINDA WAYMAN

A sturdy trailer sailer available in various stages, has come on to the market at a time when the boat consumer's attention is again being turned towards smaller, versatile craft.

The Windward 7 is produced in Victoria and constructed via hand lamination using polyester ISO resins and ISO NPG gelcoats by RMK Marine.

The Windward 7 is available in several stages, beginning with the "Home Builder" stage at \$15,800. For that you receive a hull and deck with furniture and headliner bonded; the swing keel with raise and lower winch and lockdown; the bulkheads; bow hook; and the windows marked and ready to cut out.

As well, there are poptop, hatches, toe rails and rudder ready to assemble, plus patterns for interior, windows and rudder case. And finally, there is a full set of instructions and drawings.

Options for this stage include items such as mast kit, deck fittings, pulpit, pushpit and stanchions, sails and so on.

At \$27,800, the next stage is the "Get Away", which secures you a fully assembled boat with sails; while the third stage - the "Cruising Skipper" - adds items such as furling headsail, winches, teak trim galore, carpeted floors, sinks, stove, and so on. This final stage is \$32,500.

The Windward 7, at 7.1m and weighing 1250kg, accommodates five people, and has full standing headroom in the galley. It features a masthead rig and the option of having a furling headsail. An 8hp outboard powers the boat.

RMK has only recently acquired the moulds for the boat, and has produced one boat with a second yacht in the moulding process, and a third to start shortly. The moulds have spent most of their time in Queensland, and more recently, Coffs Harbour.

The boat was originally designed by the Canadian Bruce Kirby, of Laser fame, but has been updated over the years with a swing keel and poptop. The boat is still popular in America as the San Juan 23 in both shoal draft and swing keel forms.

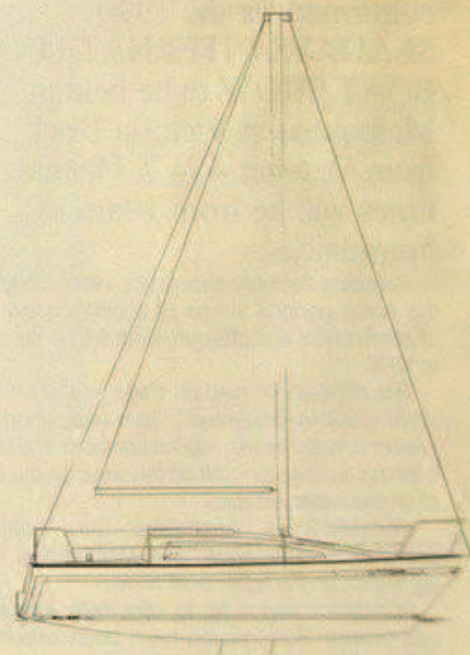

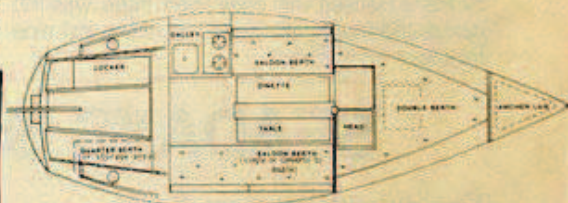

Ready to go.

RMK Marine can be contacted at 2/29 Titan Drive, Carrum Downs 3201, or by phone on (03) 786 5700.

## WINDWARD 7 SPECIFICATIONS:

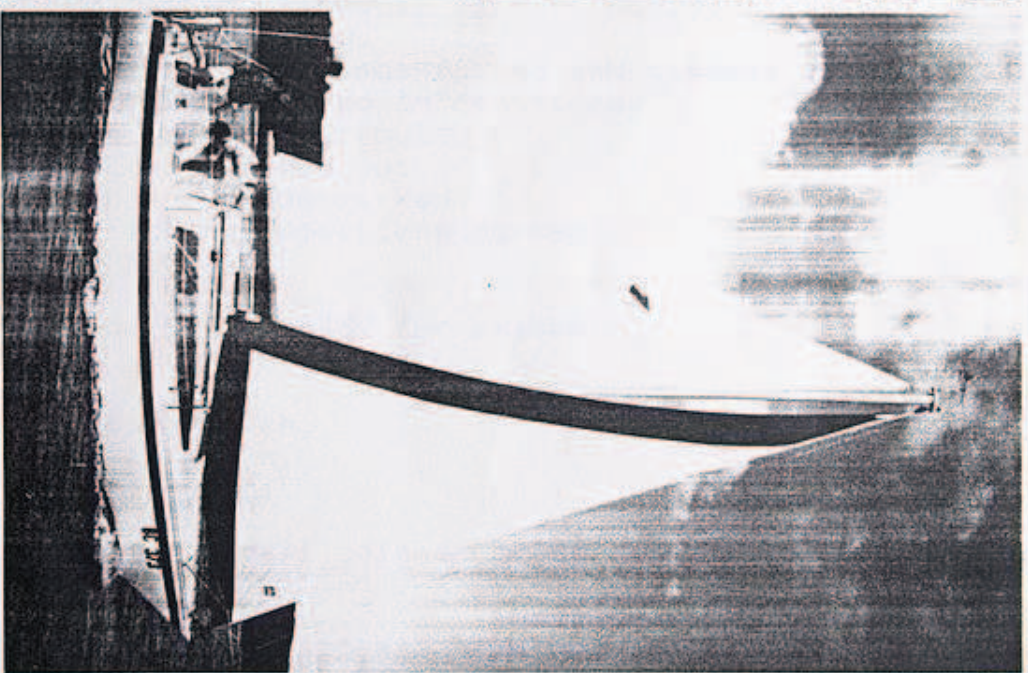

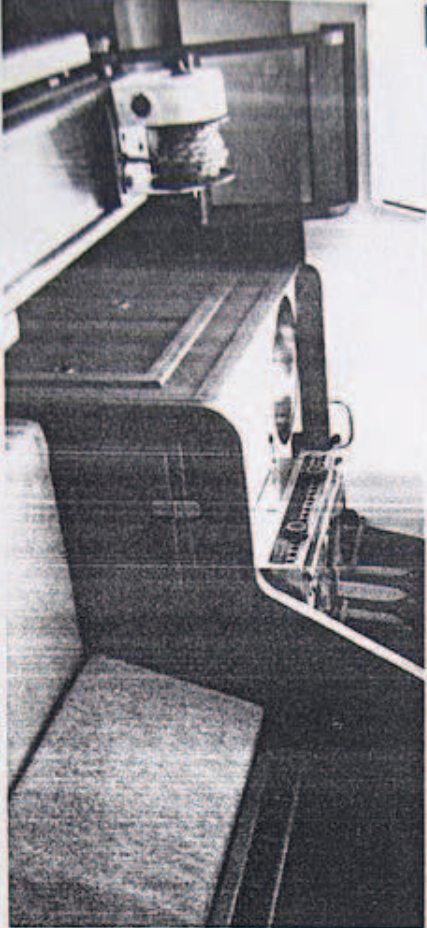

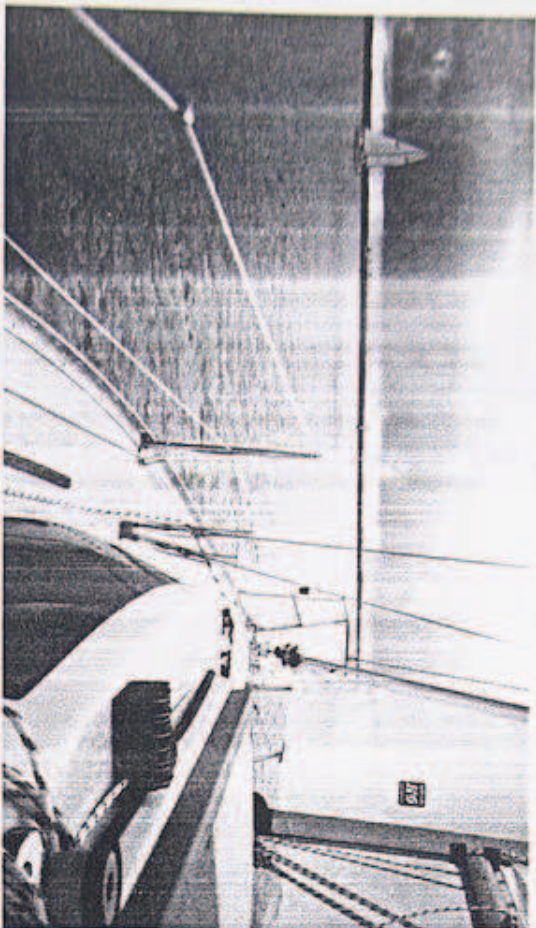

LOA: 7.1m  
LWL: 6.0m  
Beam: 2.44m  
Displacement: 1250kg "Cruising Skipper"  
Ballast: 400kg  
Draught: Keel up 0.3m; keel down 1.3m

Five adults can sit down for a meal below.
